

The Covid Pandemic and Our Children's Future: A Discussion of the Long-term Effects of Covid on Children and the Role of the Church

Date: April 13, 2022 10 AM ET

Please register in advance using [this registration link](#). You will receive a confirmation and webinar link by return email.

The Covid pandemic will have long-term consequences for children around the world. As Covid evolves from pandemic to endemic our response needs to shift from vaccination to mitigating the long-term impacts on the most vulnerable among us. This forward-looking (the emphasis on the near future) webinar will ask a diverse expert panel to speak to the following questions:

1. What is the current state of children in your context, and what are the long-term consequences and needs that will result from these impacts?
2. What do we need to do to help children and their parents and families with these impacts?
3. What is the role of the local church in responding to these needs?

Facilitator: Dr. David Boan
WEA Representative to the World Health Organization
Campaign Chair, The Interfaith Movement to End the Pandemic
